500 words

“THE CONVEYOR” WEEKLY E-NEWSLETTER

Full Banner (728x90)

\$800 net for one month (4 emails)

Average send 1,800

THE CONVEYOR

Weekly e-newsletter is sent to an email list of potato growers and industry insiders. This is an inexpensive and effective way to get your message out on short notice.

E-BLASTS

HTML-based E-blast \$800 net per send

Average send 1,800

Your message, and yours alone. Send your updates and/or offers to potato growers and industry insiders. Build in as many hotlinks as you like and expect your message to get sent quickly.

E-BLAST SPECS

E-blast specifications: Our system serves an HTML-based email message. All images and other supporting files must be called from other sources provided by the advertiser. We recommend the dimensions of the HTML design not exceed 680x907. Emails are best designed at around 600px wide. You can use any HTML tags and use inline CSS styles.

No Java Scripts or Ajax. We request all images have alternate text to help pass spam filters.

-NO DIVS, it needs to be in tables. There can be nested tables. No floats, no inline blocks, etc. It all has to be in tables.

-No linking outside stylesheets. No special font files. Anything linked elsewhere (except for images) won't work.

-It's best NOT to use HTML converters or make things in programs like Word, since Word and similar programs insert a lot of junk HTML that, at best, bloats the memory size of your email, and, at worst, won't make your email template work at all in email systems.

-No CSS styles declared in the head; Gmail and Hotmail strips them out. If you have things in the head they need to be repeated inline in the HTML, too.

Harris Publishing will add our disclaimer to the top and bottom of your email. You can supply your HTML email in a Notepad file or HTML document file.

Acceptable files for banner ads: JPG, PNG, GIF
Max banner ad file size 150 KB
